ANSWERS TO QUESTIONS

1. Examples are:
 - (a) Payment of an accounts payable.
 - (b) Collection of an accounts receivable from a customer.
 - (c) Transfer of an accounts payable to a note payable.
2. Transactions (a), (b), (d) are considered business transactions and are recorded in the accounting records because a change in assets, liabilities, or equity has been effected as a result of a transfer of values from one party to another. Transactions (c) and (e) are not business transactions because a transfer of values has not resulted, nor can the event be considered financial in nature and capable of being expressed in terms of money.
3. Transaction (a): Accounts Receivable (debit), Service Revenue (credit).
Transaction (b): Cash (debit), Accounts Receivable (credit).
Transaction (c): Office Supplies (debit), Accounts Payable (credit).
Transaction (d): Delivery Expense (debit), Cash (credit).
4. Revenue and expense accounts are referred to as temporary or nominal accounts because each period they are closed out to Income Summary in the closing process. Their balances are reduced to zero at the end of the accounting period; therefore, the term temporary or nominal is given to these accounts.
5. Andrea is not correct. The double-entry system means that for every debit amount there must be a credit amount and vice-versa. At least two accounts are affected. It does not mean that each transaction must be recorded twice.
6. Although it is not absolutely necessary that a trial balance be taken periodically, it is customary and desirable. The trial balance accomplishes two principal purposes:
 - (1) It tests the accuracy of the entries in that it proves that debits and credits of an equal amount are in the ledger.
 - (2) It provides a list of ledger accounts and their balances which may be used in preparing the financial statements and in supplying financial data about the concern.
7.
 - (a) Real account; statement of financial position.
 - (b) Real account; statement of financial position.
 - (c) Merchandise inventory is generally considered a real account appearing on the statement of financial position. It has the elements of a nominal account when the periodic inventory system is used. It may appear on the income statement when the multiple-step format is used under a periodic inventory system.
 - (d) Real account; statement of financial position.
 - (e) Real account; statement of financial position.
 - (f) Nominal account; income statement.
 - (g) Nominal account; income statement.
 - (h) Real account; statement of financial position.
8. At December 31, the three days' wages due to the employees represent a current liability. The related expense must be recorded in this period to properly reflect the expense incurred.
9.
 - (a) In a service company, revenues are service revenues and expenses are operating expenses. In a merchandising company, revenues are sales revenues and expenses consist of cost of goods sold plus operating expenses.
 - (b) The measurement process in a merchandising company consists of comparing the sales price of the merchandise inventory to the cost of goods sold and operating expenses.

Questions Chapter 3 (Continued)

10. (a) No change.
 (b) Before closing, balances exist in these accounts; after closing, no balances exist.
 (c) Before closing, balances exist in these accounts; after closing, no balances exist.
 (d) Before closing, a balance exists in this account exclusive of any dividends or the net income or net loss for the period; after closing, the balance is increased or decreased by the amount of net income or net loss, and decreased by dividends declared.
 (e) No change.
11. Adjusting entries are prepared prior to the preparation of financial statements in order to bring the accounts up to date and are necessary (1) to achieve a proper matching of revenues and expenses in measuring income and (2) to achieve an accurate presentation of assets, liabilities and equity.
12. Closing entries are prepared to transfer the balances of nominal accounts to capital (retained earnings) after the adjusting entries have been recorded and the financial statements prepared. Closing entries are necessary to reduce the balances in nominal accounts to zero in order to prepare the accounts for the next period's transactions.
13. $\text{Cost} - \text{Salvage Value} = \text{Depreciable Cost}$: $\$4,000 - \$0 = \$4,000$. $\text{Depreciable Cost} \div \text{Useful Life} = \text{Depreciation Expense For One Year}$ $\$4,000 \div 5 \text{ years} = \800 per year. The asset was used for 6 months (7/1 – 12/31), therefore 1/2-year of depreciation expense should be reported. Annual depreciation $\times 6/12 =$ amount to be reported on 2010 income statement: $\$800 \times 6/12 = \underline{\$400}$.

14.

	December 31	
Interest Receivable.....	10,000	
Interest Revenue		10,000
(To record accrued interest revenue on loan)		

Accrued expenses result from the same causes as accrued revenues. In fact, an accrued expense on the books of one company is an accrued revenue to another company.

15. No, all international companies are not subject to the same internal control standards. All public companies that list their securities on U.S. stock exchanges are subject to the internal control testing and assurance provisions of the Sarbanes-Oxley Act of 2002. International companies that list their securities on non-U.S. exchanges are not subject to these rules and there is debate as to whether they should have to comply.
16. There is concern that the cost of complying with the higher internal control provisions is making U.S. markets less competitive as a place to list securities. This in turn could give U.S. investors less investment opportunities. On the other hand, some argue that the enhanced internal control requirements in the U.S. increase the perceived reliability of companies' financial statements and helps reduce their cost of capital. Furthermore, the decline in public listings in the U.S. are more likely due to other factors, such as growth in non-U.S. markets and general globalization. Thus, the jury is still out on the net cost/benefit of Sarbanes-Oxley and its impact on international competitiveness.
17. As with accounting standards, there are differences in auditing standards across international jurisdictions. In the U.S., auditors of public companies are regulated by the Public Company Accounting Oversight Board (PCAOB). The PCAOB enforces the provisions of the Sarbanes-Oxley Act through its various auditing standards. In the international domain, the auditing standards board is the International Auditing and Assurance Standards Board (IAASB). The IAASB is working on a broad set of international auditing standards but to date does not have a law like Sarbanes-Oxley to guide its work.

Note to instructors—Some instructors may wish to direct students to the IAASB web-site <http://www.ifac.org/iaasb/> to learn more about its work and to compare to the work of the PCAOB—<http://www.pcaobus.org/>.

Questions Chapter 3 (Continued)

- *18.** Under the cash basis of accounting, revenue is recorded only when cash is received and expenses are recorded only when paid. Under the accrual basis of accounting, revenue is recognized when it is earned and expenses are recognized when incurred, without regard to the time of the receipt or payment of cash.

A cash-basis statement of financial position and income statement are incomplete and inaccurate in comparison to accrual-basis financial statements. The accrual basis matches effort (expenses) with accomplishment (revenues) in the income statement while the cash basis only presents cash receipts and cash disbursements. The accrual basis statement of financial position contains receivables, payables, accruals, prepayments, and deferrals while a cash basis statement of financial position shows none of these.

- *19.** Wages paid during the year will include the payment of any wages attributable to the prior year but unpaid at the end of the prior year. This amount is an expense of the prior year and not of the current year, and thus should be subtracted in determining wages expense. Similarly, wages paid during the year will not include any wages attributable to hours worked during the current year but not actually paid until the following year. This should be added in determining wages expense.
- *20.** Although similar to the strict cash basis, the modified cash basis of accounting requires that expenditures for capital items be charged against income over all the periods to be benefited. This is done through conventional accounting methods, such as depreciation and amortization. Under the strict cash basis, expenditures would be recognized as expenses in the period in which the corresponding cash disbursements are made.
- *21.** Reversing entries are made at the beginning of the period to reverse accruals and some deferrals. Reversing entries are not required. They are made to simplify the recording of certain transactions that will occur later in the period. The same results will be attained whether or not reversing entries are recorded.
- *22.** Disagree. A worksheet is not a permanent accounting record and its use is not required in the accounting cycle. The worksheet is an informal device for accumulating and sorting information needed for the financial statements. Its use is optional in helping to prepare financial statements.

TIME AND PURPOSE OF PROBLEMS

Problem 3-1 (Time 25–35 minutes)

Purpose—to provide an opportunity for the student to post daily transactions to a “T” account ledger, take a trial balance, prepare an income statement, a statement of financial position and a statement of changes in equity, close the ledger, and take a post-closing trial balance. The problem deals with routine transactions of a professional service firm and provides a good integration of the accounting process.

Problem 3-2 (Time 35–40 minutes)

Purpose—to provide an opportunity for the student to prepare adjusting entries, and prepare financial statements (income statement, statement of financial position, and statement of retained earnings). The student also is asked to analyze two transactions to find missing amounts.

Problem 3-3 (Time 25–30 minutes)

Purpose—to provide an opportunity for the student to prepare adjusting entries. The adjusting entries are fairly complex in nature.

Problem 3-4 (Time 40–50 minutes)

Purpose—to provide an opportunity for the student to prepare adjusting entries and an adjusted trial balance and then prepare an income statement, a retained earnings statement, and a statement of financial position. In addition, closing entries must be made and a post-closing trial balance prepared.

Problem 3-5 (Time 15–20 minutes)

Purpose—to provide the student with an opportunity to determine what adjusting entries need to be made to specific accounts listed in a partial trial balance. The student is also required to determine the amounts of certain revenue and expense items to be reported in the income statement.

Problem 3-6 (Time 25–35 minutes)

Purpose—to provide the student with an opportunity to prepare year-end adjusting entries from a trial balance and related information presented. The problem also requires the student to prepare an income statement, a statement of financial position, and a statement of changes in equity. The problem covers the basics of the end-of-period adjusting process.

Problem 3-7 (Time 25–35 minutes)

Purpose—to provide an opportunity for the student to figure out the year-end adjusting entries that were made from a trial balance and an adjusted trial balance. The student is also required to prepare an income statement, a statement of retained earnings, and a statement of financial position. In addition, the student needs to answer a number of questions related to specific accounts.

Problem 3-8 (Time 30–40 minutes)

Purpose—to provide an opportunity for the student to prepare adjusting, and closing entries. This problem presents basic adjustments including a number of accruals and deferrals. It provides the student with an integrated flow of the year-end accounting process.

Problem 3-9 (Time 30–35 minutes)

Purpose—to provide an opportunity for the student to prepare adjusting and closing entries from a trial balance and related information. The student is also required to post the entries to “T” accounts.

***Problem 3-10** (Time 35–40 minutes)

Purpose—to provide an opportunity for the student to prepare and compare (a) cash basis and accrual basis income statements, (b) cash basis and accrual basis statement of financial position, and (c) to discuss the weaknesses of cash basis accounting.

***Problem 3-11** (Time 40–50 minutes)

Purpose—to provide an opportunity for the student to complete a worksheet and then prepare a classified statement of financial position. In addition, adjusting and closing entries must be made and a post-closing trial balance prepared.

- (c) 1. Total depreciable cost = €8,750 X 6 = €52,500.
Salvage value = cost €60,000 less depreciable cost €52,500 = €7,500
2. Based on the balance in interest payable, interest is €50 per month or 1% of the note payable.
1% X 12 = 12% interest per year.
3. Salaries Expense, €11,500 less Salaries Payable 12/31/10, €1,500 = €10,000. Total payments, €12,500 – €10,000 = €2,500 Salaries Payable 12/31/09.

***PROBLEM 3-10 (Continued)**

- (c)
- 1. The £23,400 in receivables from customers is an asset and a future cash flow resulting from sales that is ignored. The cash basis understates the amount of revenues and inflow of assets in January from the sale of computers and printers by £23,400.**
 - 2. The cost of computers and printers sold in January is overstated by £23,000. The unsold computers and printers are an asset of £23,000 in the form of inventory.**
 - 3. The cash basis ignores £3,000 of the salaries that have been earned by the employees in January and will be paid in February.**
 - 4. Rent expense on the cash basis is overstated by £4,000 under the cash basis. This prepayment is an asset in the form of two months' future right to the use of office, showroom, and repair space and should appear on the balance sheet.**
 - 5. Other operating expenses on a cash basis are understated by £2,000 as is the liability for the unpaid portion of these expenses incurred in January.**

FINANCIAL REPORTING PROBLEM

- (a) **March 29, 2008 total assets: £7,161 million.
March 31, 2007 total assets: £5,381 million.**
 - (b) **March 29, 2008 cash and cash equivalents: £318 million.**
 - (c) **2008 selling and marketing expenses: £1,912.7 million.
2007 selling and marketing expenses: £1,779.2 million.**
 - (d) **2008 revenues: £9,022.0 million.
2007 revenues: £8,588.1 million.**
 - (e) **An adjusting entry for deferrals is necessary when the receipt/disbursement precedes the recognition in the financial statements. Accounts such as prepaid pension contributions and prepaid leasehold premiums are included in the Trade and other receivables section (£410.0 million at March 29, 2008). Both of these accounts would require an adjusting entry to recognize the proper amount of expense incurred during the period. In addition, depreciation expense is an adjusting entry related to a deferral.**
- An adjusting entry for an accrual is necessary when recognition in the financial statements precedes the cash receipt/disbursement, such as interest or taxes payable. Other adjusting entries probably made by M&S include finance income and finance costs and bank and other interest receivable and interest payable.**
- (f) **2007 Depreciation and amortization expense: £282.7 million
2008 Depreciation and amortization expense: £317.6 million**

COMPARATIVE ANALYSIS CASE

(a) Cadbury's percentage decrease is computed as follows:

Total assets (December 31, 2008).....	£ 8,895
Total assets (December 31, 2007).....	<u>(£11,338)</u>
Difference.....	<u>£ (2,443)</u>

$$£(2,443) \div £11,338 = \underline{(21.5)\%}$$

Nestle's percentage decrease is computed as follows:

Total assets (December 31, 2008).....	CHF 106,215
Total assets (December 31, 2007).....	<u>(115,361)</u>
Difference.....	<u>CHF (9,146)</u>

$$(9,146) \div 115,361 = \underline{(7.9)\%}$$

Cadbury suffered the larger decrease.

(b) Cadbury reported an £84 million profit from discontinued operations, which represented almost 21% of its profit from continuing operations. Reporting a discontinued operations this large may make comparisons between companies difficult. Since discontinued operations are considered to be nonrecurring, they should be excluded before comparing results between the two companies.

COMPARATIVE ANALYSIS CASE (Continued)

- (c) Cadbury had depreciation and amortization expense of £244 million (52% of operating cash flow); Nestle had depreciation and amortization expense of 3,249 CHF million (30% of operating cash flow).

Nestle has substantially more property, plant, and equipment and intangible assets than does Cadbury. Amortizable intangible assets for Cadbury and Nestle increase the amount of amortization expense recorded in income. The amount of property, plant, and equipment and amortizable intangible assets reported for these two companies is as follows:

	<u>Cadbury</u>	<u>Nestle</u>
Property, plant, and equipment (net)	£1,761,000,000	£21,097,000,000
Amortizable intangible assets (net)	<u>1,685,000,000</u>	<u>6,867,000,000</u>
	<u>£3,446,000,000</u>	<u>£27,964,000,000</u>

FINANCIAL STATEMENT ANALYSIS CASE

Vodafone

(a)				% Change	% Change
Vodafone Group plc	2009	2008	2007	2009	2008
Revenues	£ 41,017	£ 35,478	£ 31,104	15.61%	14.06%
Gross Profit %	37.00%	38.30%	39.80%	-3.39%	-3.77%
Operating Profit	£ 5,857	£ 10,047	(£ 1,564)	-41.70%	-742.39%
Operating Cash Flow less					
Capital Expenditures	7,009	6,622	6,695	5.84%	-1.09%
Profit (Loss)	3,080	6,756	(5,222)	-54.41%	-229.38%

- (b) Except for an increase in Revenues, Vodafone's earnings performance has been declining; gross profit, operating profit, and net income (profit) have declined in 2009. Note that 2007 was a very poor year; but after some improvement in 2008, things have turned a bit to the negative. One promising development is the cash flow measure, which is on the increase. So while Vodafone may be able to deliver on its free-cash-flow generation objective, the earnings performance does not give a good signal that Vodafone has been or will be able to deliver on operating performance and growth opportunities.

Without recording the adjusting entries, Amato's income is overstated. In addition, without the adjustments, Amato's current liabilities and current assets are misstated, which could affect evaluation of Amato's liquidity.

ACCOUNTING ANALYSIS PRICIPLES (Continued)

PRINCIPLES

The tradeoffs are between the timeliness of the reports, which contributes to relevance, and verifiability, the lack of which detracts from faithful representation. That is, by preparing reports more frequently, the company provides more timely information, which can make a difference to a statement reader who needs to make a decision. However, preparing statements more frequently requires more subjective estimates, which reduces faithful representation.

(a) Assets

53 The future economic benefit embodied in an asset is the potential to contribute, directly or indirectly, to the flow of cash and cash equivalents to the entity. The potential may be a productive one that is part of the operating activities of the entity. It may also take the form of convertibility into cash or cash equivalents or a capability to reduce cash outflows, such as when an alternative manufacturing process lowers the costs of production.

54 An entity usually employs its assets to produce goods or services capable of satisfying the wants or needs of customers; because these goods or services can satisfy these wants or needs, customers are prepared to pay for them and hence contribute to the cash flow of the entity. Cash itself renders a service to the entity because of its command over other resources.

55 The future economic benefits embodied in an asset may flow to the entity in a number of ways. For example, an asset may be:

- a.** used singly or in combination with other assets in the production of goods or services to be sold by the entity;
- b.** exchanged for other assets;
- c.** used to settle a liability; or
- d.** distributed to the owners of the entity.

(b) Liabilities

60 An essential characteristic of a liability is that the entity has a present obligation. An obligation is a duty or responsibility to act or perform in a certain way. Obligations may be legally enforceable as a consequence of a binding contract or statutory requirement. This is normally the case, for example, with amounts payable for goods and services received. Obligations also arise, however, from normal business practice, custom and a desire to maintain good business relations or act in an equitable manner. If, for example, an entity decides as a matter of policy to rectify faults in its products even when these become apparent after the warranty period has expired, the amounts that are expected to be expended in respect of goods already sold are liabilities.

PROFESSIONAL RESEARCH (Continued)

61 A distinction needs to be drawn between a present obligation and a future commitment. A decision by the management of an entity to acquire assets in the future does not, of itself, give rise to a present obligation. An obligation normally arises only when the asset is delivered or the entity enters into an irrevocable agreement to acquire the asset. In the latter case, the irrevocable nature of the agreement means that the economic consequences of failing to honour the obligation, for example, because of the existence of a substantial penalty, leave the entity with little, if any, discretion to avoid the outflow of resources to another party.

62 The settlement of a present obligation usually involves the entity giving up resources embodying economic benefits in order to satisfy the claim of the other party. Settlement of a present obligation may occur in a number of ways, for example, by:

- a. payment of cash;
- b. transfer of other assets;
- c. provision of services;
- d. replacement of that obligation with another obligation; or
- e. conversion of the obligation to equity.

(c) Accrual basis

22 In order to meet their objectives, financial statements are prepared on the accrual basis of accounting. Under this basis, the effects of transactions and other events are recognised when they occur (and not as cash or its equivalent is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate. Financial statements prepared on the accrual basis inform users not only of past transactions involving the payment and receipt of cash but also of obligations to pay cash in the future and of resources that represent cash to be received in the future. Hence, they provide the type of information about past transactions and other events that is most useful to users in making economic decisions.

Explanation

Following preparation of financial statements (see Illustration 3-6), Nalezny would prepare closing entries to reduce the temporary accounts to zero. Some companies prepare a post-closing trial balance and reversing entries.
